To Our Loyal Customers,

We want to sincerely thank you for your continued support and loyalty to **TheWeedShop Inc.** As the cannabis industry continues to evolve nationwide, we believe it is important to keep our customers informed regarding upcoming federal regulatory changes that may affect future purchases and shipping policies.

Beginning **November 1st, 2026**, all out-of-state sales will require customers to provide proof of a valid medical cannabis card or licensed medical prescription before orders can be fulfilled. These changes are expected following the expiration of provisions associated with the 2018 Farm Bill, along with cannabis being federally reclassified as a Schedule III substance under the Controlled Substance Act.

To help our customers prepare, we will continue processing and shipping out-of-state orders under the current system for the next **six months**. We strongly encourage customers to take advantage of this window while supplies remain available.

Obtaining a medical cannabis recommendation has become extremely simple and convenient. We recommend visiting **VeriHeal** to schedule a fast and confidential online consultation with a licensed physician. In many states, approvals can be completed entirely online within minutes.

If VeriHeal is unavailable in your state, please ask your doctor about Dronabinol, Marinol, or Syndros. A valid prescription for any of these medications may qualify you to shop with us and purchase our products from out of state, subject to all applicable local and federal laws.

As a thank you to our verified medical patients, all approved medical-card holders will now receive an ongoing **5% discount** on all future purchases.

We greatly appreciate your business and continued trust in our company. Our team remains committed to providing premium products, reliable service, and a smooth transition throughout these upcoming industry changes.

Sincerely,
TheWeedShop Inc.
